

WHAT WE DID – PHASE 1

MEADOWLARK PARK: WHAT WE DID

THEME	WHAT WE HEARD	WHAT WE DID
Key locations for walking and biking	• Chinook Centre • Glenmore Trail Pathway • Along 5th Street S.W. • Commute to downtown • Glenmore Reservoir • Exercise	• Improving walking and biking access to these destinations through a mix of proposed traffic calming measures. • Wayfinding signage is proposed to help people navigate to these key locations.
Crossings	• Crossings over 5 St. S.W. from Meadowview Rd to Chinook Centre are too steep.	• Accessibility improvements to the northern-most crossing of 5 St are proposed. Space does not allow for improvements at the other crossings without impacts to vehicle traffic flow.
Cycling	• Need for winter maintenance • Cycling safety concerns along 5th St. S.W., and at the crossing bridge at Glenmore Tr S.W.	• The project team has been coordinating with relevant City departments to discuss winter maintenance options that would permit the full route to be Always Available for All Ages and Abilities. • Improved roadway markings are proposed to increase driver awareness of bicycles at road crossings.
Missing link	• Bike path desired around Chinook Centre	• The City cannot provide cycling connections within private property (i.e. CF Chinook Centre). • We are proposing improved crossings over 5 St S.W. into Chinook.
