

Verbatim Online Survey Comments

Northeast Athletic Complex

Fall 2024

Verbatim open text survey responses

If you participate in a sport not listed above and wish to utilize the fields for your sport, please indicate the sport(s) and tell us why?
Who and how many player play the above mentioned sports in Northeast Calgary? Soccer is THE most popular sport in NE Calgary and we DO NOT have anything other than the Genesis Turf north of 16 ave! Building facilities that will never be used, should not be happening with public money. PERIOD.
I think there should also be options for those needing high ceilings and turf to practice their activities inside like Marching bands, color guard, and cheerleading. I also think there should be a track indoors, for year-round proper training.
beach Volley Ball, Volley ball
Plz add Badminton  court. Bcoz we have so many badminton players and don't have enough indoor ground for practice
Badminton
Badminton
Soccer, Tennis, Paddle
Soccer, because all the other fields for soccer are so well utilized, and generally in the northwest of the city, it would be nice to have an additional facility in another part of the city. Soccer is still one of the fastest growing sports in the city.
Soccer. There are not enough facilities to accommodate this sport and they city has not done a good enough job to help promote the largest played youth and adult sport in the city.
Soccer
Baseball - Really enjoy baseball and would love to see this in NE.
Participate in soccer and I'm wondering why this facility is being built in such close proximity to the Genesis Centre when SW Calgary currently has NO SUCH FACILITIES.
Soccer
Soccer
Soccer - number of kids playing soccer has increased and there is no enough space to match their games schedule in a playing format necessary at their age. Example playing 9v9 instead of 11v11 at age 13 for the outdoors
Soccer, youth soccer does not have enough fields to book
Indoor soccer fields. So needed in the winter months.
Soccer is mostly the sports my kids are interested in.
Can the cricket ground be used to host Cavalry FC matches. If yes then they ground would have to comply with CONCACAF & FIFA requirements
Soccer as it's also a growing sport
Soccer would be #1 for me if it was listed.
Just soccer
Soccer ranked #1.

Soccer!!!
Soccer - we always need more great fields
Cricket, soccer
Cricket. It is the first preference/choice of sport of majority of residents in NE.
soccer. Not enough soccer pitches in city.
Soccer
Soccer fields. More soccer fields are needed in the city.
soccer
Soccer. Why? There are not enough indoor fields in Calgary.
Soccer!
Badminton courts
Soccer! Not enough turf fields in the city.
Soccer
Soccer
Soccer! It's the largest growing sport in Calgary and with our weather soccer fields are needed as it's a sport that runs year round.
Soccer
Soccer. Lack of good quality, regulation size fields for games.
Soccer. We need more facilities that don't have boards. The game has evolved to be playing without boards and our soccer centre in the SE still has boards, which means it's not really useful for soccer.
Soccer - never enough quality pitches.
Soccer. Because there are only 4 field houses in Calgary.
Soccer, there are no soccer indoor facilities in the northeast
Soccer and tackle football. Not enough artificial turf fields in the city for training and games outdoor over a longer portion of the year that can be used in wet and colder weather. March-November.
SOCCER - THERE ARE LOTS OF FACILITIES IN THE NE WHILE THE NW IS LACKING IN APPROPRIATE FACILITIES. THE SOCCER DOME AT BEARSPAW IS BADLY DESIGNED - FULL SIZED PITCH WITH NO ROOM AROUND EDGES. WHEN PITCH IS SPLIT THERE IS NO ROOM BETWEEN PITCHES RESULTING IN GAMES CONSTANTLY BEING INTERRUPTED BY SOCCER BALLS FROM OTHER PITCHES. SOCCER IS ONE OF THE TOP PLAYED SPORTS IN THE CITY AND FACILITIES ARE ALWAYS AN AFTER THOUGHT. NEW FACILITIES SHOULD BE IN A CENTRAL LOCATION FOR USE FOR THE ENTIRE CITY AND NOT JUST FOR THE OVER PRIVILEGED NE WHO ALREADY HAVE THE BEST FACILITIES ALREADY IN THE ENTIRE CITY.
Soccer
Also wanted to say good job on the "gender identity" question, I always see the options as

"female, male, or other" and it's silly because female and male aren't gender based terminology they're sex based terminology. You poll designer people did a wonderful job.
Soccer. There is a shortage in Calgary. Needs more fields.
Soccer
Soccer, for Calgary we need more indoor full size soccer fields to allow us to compete against places like Vancouver that can play all winter long and are able to develop better players.
Hurling
Soccer
Soccer, we don't have too many facilities in the city
Soccer
Soccer. Because it's Canada's number one sport.
Soccer
Soccer. Most popular sport in Calgary
Soccer
Soccer. We have a need for soccer fields in the NE to enable leagues (such as Airdrie and Crossfield) to have access too. (Since they are under the umbrella of Calgary Minor Soccer).
Soccer, pickleball
Soccer
Soccer
Soccer
Soccer
Soccer. Our city compared to others including Edmonton lack in this growing sport and indoor fields to facilitate the growing numbers. As a result there are limited space for practice (must resort to school gyms), and games compressed to 7v7 or 9v9 for those that should be playing 11v11. Those already competing at 11v11 lack access as well. From armature youth rec or competitive, to Major and League1 level soccer.
Soccer.... because there is not enough facility space to accommodate the growth of Soccer in our country and we especially in our city!
Soccer - fastest growing sport in Canada and Calgary has the least facilities considering its population, CMAA membership and compared to other cities
Soccer
Soccer
Soccer is the sport growing the most in Canada.
soccer
Just soccer
Soccer
Soccer. There is much needed soccer space in the city, compared to Edmonton, our facilities can't accommodate many teams in one facility specially when you have families with 2 or more kids playing at the same time and they have to be at different facilities at the same time

Soccer, there should also be an incentive program for non-parent youth coaches atleast in order to help them promote their input.
Soccer
Soccer
Soccer. There is definitely not enough indoor soccer fields for Calgary. Soccer is 11 v 11 sport. Not 7v7 crap that we are paying for.
Soccer
soccer, baseball - lacking larger scale baseball facility.
You can't have enough new indoor soccer space. It's so desperately needed.
Soccer! We desperately need more soccer fields in Calgary. We don't have enough for the growing demand
Soccer
Soccer
Soccer. My daughter plays soccer weekly and we live in the NW but often have to drive to far south to play games. It would be nice to have another closer location.
Soccer!
Soccer
Soccer much more fields needed
Baseball soccer
soccer turf. There's only a couple of soccer turf field in Calgary, which is not enough to meet demand.
Soccer. Because we are in desperate need of more soccer fields in the city.
SOCCER
Soccer is growing so fast in Calgary among new immigrants so it would make sense to have an artificial turf field for soccer like the one at The Genesis Centre and field can also be used for Field lacrosse, field hockey, and other sports
Soccer
No
Ice for curling all year round would be nice
Baseball (batting cages)
Women's field lacrosse and men's field lacrosse have different rules and lines.
Assuming that Cricket and Soccer are top of the list
Beach Volleyball is growing at a crazy pace and make for a great amenity.
I think just general sports and play are good for the community.
Track and field
N/A
Soccer, cricket
Cricket, Football (soccer), track and field.

Volleyball - there is a huge shortage of gym space. Volleyball often has to compete with basketball for gym space. Hundreds of kids are turned away each year which usually means they never even start this sport which usually begins around the age of 12. They are stopped before they start.
Pickle Ball as there aren't any field around here that I know of.
Badminton, indoor facility can be used for this as the winter needs a sport facility.
Field soccer and basketball
Soccer, basketball, badminton
Volleyball because there aren't many rec centres for this sport.
Cricket
I would like to know if there is going to be an indoor running track that is 200m in length and oval shape so that track and field athletes can use the facility as well. I could be around the fields and make a much needed part of training for all field sports as well. We would like an area to throw and jump as well if possible the fields would have a space to throw in but PV HJ and LJ would be nice to fit in around the field spaces.
Soccer
Volleyball and beach volleyball
Tennis, we don't have any around this area
Running in big open field with tracks.
Tennis
Badminton-
You have missed baseball and volleyball/ indoor and beach. Baseball is suffering with venue space after closing Richmond fields. volleyball is privately funded with no areas for play. cricket should be privately funded rather than supported by tax payers. A quick search shows 40k playing cricket in Canada as compared to 500-800k for volleyball and 120k for baseball and growing. Perhaps advise those who want a cricket field to try a similar sponsorship to the Alberta tennis center.
Badminton, Tennis
Volleyball Currently, most provincial and national tournaments have to be held in edmonton due to capacity limitations open calgary. I think I go to edmonton at least 6 to 10 times per year for my kid sports
Soccer 🏴󠆲󠆧 as it is a good sport and it is globally loved and watched.
Volleyball Beach Volleyball
Basketball. I'm not aware of any easily accessible outdoor whole court, especially in the NE, where there is a sizeable Filipino population.
Volleyball! It is the fastest growing sport in Alberta, especially amongst youth, and literally (unlike hockey or

soccer where everyone gets to play) kids are being turned away because there is not enough gym space to accommodate!
Volleyball courts and basketball courts. There are so many athletes in NE that can benefit from having volleyball courts (May be something like Seven Chiefs facility that is in the south). I had to drive my kids to these far off facilities because there was no option in NE for the courts.
Soccer
KABAADI - National Sport Of India
Soccer Turf, Skating ring. I love playing and watching soccer, and I would love to see my kids learn skating.
Can you make it for volleyball please. Not enough courts to play for kids and adults in this area
Volleyball courts...There is shortage of volleyball courts in Calgary.
Volleyball, beach and indoor
Volleyball. Extremely popular sport undergoing massive growth. Calgary does not currently have a proper facility to host large tournaments as most other cities do.
Volleyball because it is a growing sport throughout Canada and the US. There are thousands of athletes that come in all ages, throughout the year and it would be beneficial to anyone flying in due to the convenience of the location right beside the airport.
Volleyball
Football. There are 3 fields for the entire city to use and one loses it availability for a chunk of time while the bubble is put up or taken down.
Ice hockey. The NE desperately lacks hockey rinks.
Volleyball, there is a growing volleyball community in Calgary and it would be lovely to have a volleyball space in Calgary where you can drop in instead of rent.
Volleyball indoor & beach volleyball
Volleyball, though there are other places to host volleyball alberta events. It would be nice to have all divisions seen in the same complex or city.
Volleyball
Cricket. It is getting popular in Canada now and we even had a Canadian team this year that participated in the t20 world cup.
Volleyball, because it is a growing sport in alberta and very popular and loved.
VOLLEYBALL. Volleyball is the fastest growing female sport in Calgary, with males following their lead. As a current Calgary volleyball coach who played volleyball for University of Calgary Dinos, I know the demand that is in place for gyms. I work out of 3 separate gyms in the city and have an incredibly hard time finding courts to use. Volleyball has always been an underrated and underserved sport when designing multi-plexes, usually not leaving appropriate spacing or not having seating room for viewers. It would be amazing to include this to the indoor area :)
Cricket and badminton! We play at Genesis but it's always busy and lot of traffic
Volleyball
Softball needs an indoor space for players to practice etc over the winter months

Cricket
Cricket, as there's more demand than availability for cricket grounds in NE
volleyball because there is not a lot of places to play volleyball without booking
I really wish you would make sure our current infrastructure is sound and up to date before investing in "optional" infrastructure that will put more strain on already aging systems. And more public engagement, other than a single sign in my neighborhood, would be appreciated. You put it right beside a field where cricket is played every weekend. Don't you think the replies are going to be a bit biased?
Volleyball for the indoor spaces.
Baseball for indoor and/or outdoor spaces
Volleyball!!!!!! Please!!!! We need more volleyball facilities since the city shut down access to school gyms we don't have enough space and volleyball is booming.
Grass volleyball
Volleyball
Volleyball
Volleyball
My son loves to play. More VB courts means more teams, means more kids have a chance to play.
Volleyball 🏐 indoor!
volleyball
Track and field. The city deserves a venue that can host track & field meets at national and international level. Track & field is the most important sport at all levels of school and clubs and there is no track and field venue with covered expectator sitting and decent barhrooms in the city that can host an important event.
Must include soccer in the list above as well. More and more young kids motivated towards soccer if they professional ground close to their home. It should be indoor as well to practice in the winter as well. Even various clubs for different age group would be able to use it for tournaments.
Soccer
Soccer
Basketball, Table Tennis, Tennis, Badminton
Soccer, cricket, and big running track around the whole field. Some people love to run and walk . You can build a good long stretch of Olympic running tracks around the field
I can't find field in the NE that offers more than 12 baskets for frisbee/disc golf. This is a non contact low impact sport that all ages with varying abilities can play while actively engaging with the natural environment and getting good exercise through walking/ throwing. The course should also be designed to be accessible by mobility devices including electric bicycles which are being used by an increasing number of seniors as a mode of active transportation.
Summing lessons, tennis, basketball, soccer
Soccer,volleyball

n/a
Volleyball
Soccer more people enjoy playing soccer so should be placed as number 1 priority
Soccer - both my kids are playing soccer
Wrestling / MMA
Soccer. Badminton. Volleyball. Those nothing else.
Soccer
Ball hockey
None
None
Kabaddi, Baseball, Kickball. All of these can be accomodated with a baseball diamond.
Field Hockey
Filed hockey
basketball. its not on list but its one of the most popular sport among everyone. need atleast 2 courts
I want cricket pitch
Soccer, The only facility right now in the neighborhood is Genesis. Their outdoor turf is booked till July. The outdoor fields near schools are not groomed for proper play.
Cricket
Yes
Badminton
The far NE has no rinks what so ever! This is Canada! We need a facility closer to Skyview with a rink and a pool. Another complex closer to Genesis is a waste of money
This HAS to be a joke right? How is this benefiting my community in Skyview?? We cant walk or safely ride our bikes to this location. Further more, isn't there already a sport complex in that area???
Lost my vote sir.
Tennis is on the rise in Calgary and Canada and the Northeast residents and families are being denied of the opportunity to access this sport. Other areas are not the ones only entitled to learn this sport.
Swimming
Soccer please? I organize a women's soccer league for adults. We always have problems finding an indoor field.
Soccer. My observation is that majority of youth is very much interested in soccer.
Soccer
Tennis
Cricket and badminton and basketball
Basketball, badminton and soccer as the kids are mostly interested in these sports.

Running track
Soccer, cricket, lawn Tennis, because these are very popular in these communities by ethnic background. Plus less expensive equipment required so majority can effort them
soccer. a lot of my soccer buddies live in the area. we would like to play together there
Badminton
Tennis
Volleyball
Running tracks
Kabaddi, coz this game needs ground and if we have we and youth can play
Soccer. Biggest sport in the world and always is being played.
Nope and taking away more green space is annoying
Soccer is number 1. The city is way behind building out these facilities. Edmonton has many facilities and it better setup than Calgary.
Walking space indoors like the Calgary Soccer Centre as a lot of community members of the north east like to walk or get steps in. A lot of them are seniors and have no space to walk in the winter months. A raised walking area like the one in Calgary Soccer Centre would benefit the community.
Badminton, Volleyball, Tennis, Basketball
Soccer, easy and inexpensive to join.
Basketball
Cricket will be best option, especially indoor cricket stadium so that people can play during winters.
How about a velodrome for cycling.
There is no curling rink in the NE
Soccer
Lawn tennis court could be a great addition as that could be a place for mid and senior aged people.
Track - health reasons and training
Ice hockey
Badminton
Track running
Cricket
Cycling and mountain biking
Basketball. Where are the basketball courts? We have a huge shortage of quality basketball courts in the N.E. So much demand for nice outdoor basketball courts.
Polo because there's not enough polo fields
Lawn tennis, badminton will also be a good idea

Soccer
I playing football from 5 years
Disc golf!!
. Outdoor water pool. With global warming, it's going to be increasing importance to provide cooling stations around the city
Baseball or slo pitch
soccer , it's a good physical game for all aged kids
Normal football
Cricket, based on our demographic it is the most popular sport in East Asian community
Soccer
Beach volleyball
Badminton and Tennis. Very popular sports in the community so it would be nice to have more space!
Outdoor volleyball court: easy to organize games with friends and would only require a net with vinyl tape indicating the court. If volleyball were to be set up by the city, using a small portion of the field would only be required to establish at least 2 courts.
Basketball, Badminton, Swimming
Every sports facility should be built like genius airdrie you can have your pools and field houses and stuff but it needs to include a ice arena complex in it too to truly be multi sport that's inclusive
Ice hockey rink
Baseball/community rink
Track.....jogging
Cricket : very few grounds for cricket
Volleyball
Soccer
We need it asap
Tennis, badminton and pickle ball! I find Calgary in general and specifically the NE limited in these styles of courts. Other urban cities provide these outdoor courts that would accommodate these sports but these sports are newly popular because of the low barrier to entry.
Badminton
Running tracks and outdoor workout equipment...
Soccer
Cricket
Badminton, most of the kids also love playing badminton
Tennis
Swimming
Because kids like it. And it's a good physical activity

Tennis.. My kids are interested in Tennis but NE has no facility for indoor tennis. Please, this should be added in the facility.
Baseball/softball
Soccer, basketball
soccer
Basketball is a huge sport here in the NE and in Ward 5, especially with the Filipino community. With Ward 5 now having the most Filipinos and predominately all located in Saddle Ridge, basketball should be included to accommodate our players aside from the school nets that have been damaged or are not suited for outdoor basketball. Saddle Ridge, itself, has been asking for a basketball court somewhere on the west side or near the Genesis center. Since the Genesis and Don Hartman Centre has huge traction with basketball such as with Rise Up Hoops and other clubs that use these spaces, it would be essential to have that third space especially being close to the airport.
Cricket
Track and Field
Competitive Spike ball engages young adults especially in the university sector. bocce and lawn bowling engage seniors and are adaptive sports for those with physical disabilities. We need more adaptable fields and turf spaces for those sports.
Calgary needs an indoor athletic complex for track & field as highest priority. It's the most inclusive sport.
Soccer Craft market Running track One field cement for rollerblading (roller skating) , pickle ball, exercise (spin classes)
Basketball
Volleyball courts with closed fence.Volleyball is a very popular game among residents of NE calgary.We can surely use some courts.P.S not beach volleyball. 2)Circle style Kabbadi
Tackle Football
Wrestling.
Squash and Tennis. There is very none to limited places you can go for these two sports in the NE.
Cricket. Me my family and friends have migrated here from South Asia, we are die hard fans of cricket and always were looking for a place in the NE Quadrant to play cricket. We have atleast 12 people in our friend and family circle that will use this spots complex to play cricket.
Soccer and basketball
Soccer
Basketball, volleyball, hockey, a skating rink would be more useful and would have more engagement than any other above mentioned activities. Aside from cricket which is enjoyed by only a specific group of people, engagement should also be considered. All above mentioned

activities I feel would only have few participants. And I'm assuming these complex is going to add more to property tax I'd rather have this complex have more engagement and collect fees to pay for itself
Cricket
We need field hockey astro turf as there are kore than 5 clubs in NE and we don't have any dedicated ground.
Volley ball
Badminton
Soccer. Low chance of concussions and low equipment costs.
Ball Hockey. Needs hard surface, usually unflooded ice rink.
There are no permanent ice rinks north of Martindale or East of Deerfoot Tr. There are already plenty of cricket pitches across Ward 5, with baseball pitches being converted and new plans for Cornerstone Park to also have built cricket pitches. We do not need any more.
Cricket and soccer
na
Box Cricket
Tennis badminton
Baseball
Cricket because I love the sport.
Volleyball is much needed as we don't have much grounds for Volleyball.
Cricket and Kabadi
Volley ball
Soccer
Ice hockey
Indoor tennis and pickleball
Ice hockey rink because theres so much growth in the hockey community in the saddleridge taradale area and the only rink we can go to is the martindale one which gets packed and the ice is really bad every other day because of the amount of people there
Kabbadi
Ball hockey
Badminton, being the city cold most of the year it keeps everyone active
Archery
Kabaddi
Cricket

Why did you rank these (question 3a) the way you did?
--

Experience as a parent going to soccer for 8 years
Based on actual necessities that I observed organizing sports activities over 15 years of outdoor sports in NE Calgary.
This location is far out of the way of 3/4 of Calgarians. There needs to be the ability for those who are bringing kids/families with them to comfortably wait for games to be over, and have everything they need.
According to the basic sports complex requirements.
Based on certain amenities missing or not planned for in existing facilities
I've been coaching for 22 years
Many current outdoor field lacrosse facilities lack adequate player and spectator seating
I have spent many hours at the field with my son. Travelled and done local lacrosse. Shade is crucial, seating is important and lights allow more use of the fields. Night games in the summer are amazing.
.
I think the most important thing is the players comfort, next the spectators. I would also add change rooms and washrooms within the facility.
It's all about the players and then their families to create an enriching, safe experience.
It's important for some shade area for everyone to enjoy
Sheltered player seating (benches) necessary to protect players from our varied weather; spectator seating encourages parents and supporters to watch games; lighting offers longer hours of use.
based my own experience as a soccer referee
Taking care of players before spectators
To economize the space
Because that's what is lacking in current youth soccer field spaces
Seating is a must for spectators and players. Outdoor lighting would be helpful to extend use of time for fields. As for all the others, it's all fluff, most time spent at a facility for games is fleeting. Food, shade, storage not necessary.
Necessities
From attending other games, it seems that's what most people use.
The players come first then comes the spectators
Playing games at night will increase potential time to use the field. Spectator seating will encourage people to support their teams.
I'm a coach
I want to watch my kids comfortably.
Amenities for players and spectators is most important. Current facilities lack space for both players and spectators to enjoy the game.
Because those are what's most important to me

Place to escape from the sun between games is a big plus, providing seating for spectators helps keep them in a specific space, as opposed to lawn chairs all over the sidelines. The ability to play games at night will mean more people can use the fields.
See as a real game needs opportunities
Players and spectators are my priority for comfort considerations.
I think the comfort of the players and spectators should be top priority
because
As a soccer family, we attend several games. Most important are my Sons health and wellbeing during games.
Focus on safe athletic participation
Spaces to accommodate players and their equipment should be the first priority along with shaded areas to shelter from the sun.
Spectator areas are dismal in other facilities, preventing fans (family members) from coming to watch kids play.
My kids are getting older and play soccer at later times
In order of importance To
it's about having the space to play, and less about the amenities. WASHROOMS though!!! And space for WARM-UPS when other games are still on the fields.
Have more spectators attend if we make it more for them.
Based on the level of priority
to facilitate good sporting experience for youth
I play soccer and these would be most important for safety and enjoyment of the games.
personal preference
Because many recent facilities, especially the Shouldice Dome have failed to properly provide adequate player benches, and spectator seating. This is the facility my family visits most often and sadly it's not up to the standards that other facilities are
It is most important to least important
Outdoor lighting allows longer use of the outdoor facilities. Spectator seating because youth playing often have their parents watching, shaded outdoor areas because the summer sun is very hot, concessions as a small profit maker.
It allows the community to make the most use out of the facility, and provides comfort and a welcoming environment to players and supports alike.
Spectator seating is import and it would get quite disorganized if they brought their own seating. In addition, outdoor lighting for evening games and practices would increase the functionality and potential for rental.
open fields can be hard in the summer with the intense sun. Lights will expand the playing time available.
Players benches are a must, ruins the field if people are bringing their own chairs on
Because these lack at many facilities around the city

As seating is important - normally turf fields do not like portable player benches on the turf for team seating. Spectator seating is very important as well, no facilities with turf currently have a good viewing area.
Comfort for users and spectators is critical to hosting proper events.
Many complexes don't have enough/ any seating for spectators. This is incredibly frustrating and takes away from the experience
Need benches...then you need lights. Then, you need stands. Then food is good for the fans
Because players and spectators need a place to sit
Seating areas focus players attention on the game and to coaches instead of on whatever they are doing to pass time. Spectators are an essential part of sport for minors. Outdoor lighting extends the season by at least two months.
Because they are essential and the others aren't necessary.
Prioritize user comfort and spectator comfort.
There is nothing worse than having to constantly contribute toward the purchase of team benches. It is a staple for substitute players to have somewhere to sit so it is also a safety aspect. Flood lights are also essential.
Spectators are normally the people who pay for the kids sports. They want to be able to watch. Lights allow for more use in the early summer months. Change rooms are key.
As a 16 y/o soccer player these are what I want as a player, and these views would probably be shared by my team.
Based on personal experience as an athlete as to what is important
Previous experience
Seems appropriate. Particularly evening play lights is important as our nights come so early in the fall.
From what I see on other fields
For family involvement in the sports it is best to have spectator seating
It is important to have a comfortable place to play for the players as well as the parents and spectators
Priority of need
Players are the most important
Outdoor lighting expands the use time of the facilities
Existing facilities for soccer have poor excuses for player benches/seating.
Too many facilities neglect seating capacity or it is an after thought
Players first
Player amenities are most important
Seating is necessary for athletes and spectators!
Preference given to the sport, players and spectators in order of priority
for the athletes is important and the parents
Maximize usage

Change rooms and washrooms also need to be an option,
Teams first then spectators.
Based on things I see missing from other athletic spaces and things I see that we like to have access to.
20 years experience on what is needed and sitting on the board when Shouldice was redone
Player experience first, good seating for parents to watch
Calgary West is such a good sports field but absolutely lacks players seating, parents and spectators walking and sitting right by players bench is not ideal
Players and spectators need designated spaces, meeting rooms are important for most teams to prepare for each game
Players come first and need a seating area, preferably a covered or sheltered seating area. Shaded area for spectators is important, spectators seating always a bonus! Lighting to not limit the games to early playing times.
Based on practical needs
Focus on the game and quality fields or field houses first. The rest is a byproduct.
The bare mins that a complex should have
Player and spectator are priority
things needed to actually play the sports are most important, missing from list is change rooms
Good players seating is required for high level competition
Because these are essential during games to ensure it's pleasant for players and spectators
There's always lack of these facilities in most the indoor arenas
We need something in NE we are so not cared for
The players should be the key players in this project. For soccer players, it is important that they have the facilities to play either outdoor or indoor throughout the year.
My top 3 are the top 3 for these are lacking at all venues presently in use.all
Participant's comfort
It is important for athletes to have shaded areas for hot days when they play tournaments. This avoids heat stroke occurrences.
The spectator area at most current facilities is not ideal. It would be nice to not have this element overlooked again.
Makes sense
A place for spectators to sit and watch is important, as you'll have many people not watch, hang out in vehicles or leave. Storage area is least important as it's just another place to commit crime ... theft.
Promoting a sport requires a federation or association taking care of the players, coaches, other staff and spectators.
I also think there should be dressing rooms. I ranked that way because every current facility has some but lacks others. Players come first, spectators should have a proper viewing area that doesn't distract from the players area
so many fields have no player seating and its hard to see these athletes sitting on the ground

Optimize facilities for the players, and maximize the usage of the fields. The concessions are a nice to have, but not required to use the facilities, and the meeting rooms and storage should not be required at all to minimize the cost of the facilities .
Players come first, the benches should also include shelter from weather, especially rain.
Focus should be on players first and spectators second. Storage space is not required unless the facility will partner with local clubs those clubs may need Storage.
Years of my kids playing soccer and travelling to tournaments. These things are essential.
Soccer
Importance.
Need a proper way to watch the sports. Players need a place to be as a team. Don't really need a place to eat but if there might be nice.
If there's a concession it should have healthy food
In order of most importance. Players always come first.
Because I feel this shows how I would rank the importance.
Spectator viewing is priority, players need change rooms and warm up spaces
Because you asked, and that's how I felt. Odd question
Lighting is allowed to hold the game in the evening.
The heat and sun can be extremely high during the soccer outdoor season. It is not uncommon for players and even spectators to get heat strokes. Most outdoor facilities we play in don't have any available shade or seats.
Priorities
View from a soccer mum
Seating and lighting for evening events is essential for widening the types of uses for the facilities
It is important to make the event as comfortable as possible and to allow Spectator's to watch the event easily without bring several chairs.
Play arts and fans need to be comfortable and storage is vital
experience
Concession is not at all important most of the time, but adequate space for players and spectators are
of importance
Perfect
lights maximize the time on the field, we all need food and drink, players need a place to gather and set up so players bench and meeting rooms are a tie for me. I am not bringing my dog so shade is a last thing
Players need to sit. Summer can be very hot. Lights allows play in the evenings and shoulder seasons. Spectators often bring their own chairs. Storing nets is easier for teams. Buying food/drinks is easier then having to drive and park again.
as a spectator I want seating and food. Lights and player seating are more for the players and safety.

Light: extend the usage time of the fields. Storage: critical for sport groups to run programs in this quadrant
For field hockey, we rarely get the benefit of additional amenities. In fact, we rarely get fields with proper line markings and the type of artificial turf that is needed for our sport so we start with basics first.
expanding programming is the priority vs amenities.
I don't think we need concession and meeting rooms - however if you do put these in, I think that the team who run the Genesis Centre should be running and managing this new community service
importance
Shades for summer heat and seating so that we can enjoy together
To invite and build community and supports teams to progress.
People need outdoor seating for sports
Most important to least important
Players play and families cheer. There is not a lot of equipment to store. Nets, poles and balls.
Most of Asian community having g interest in field hockey are Living in this area.
It will help to support the games
Concessions, seating area and shaded areas are important for the players
As needed for our sport
Both winter and summer use
Personal preference for field sports.
I tried to take into account what has been desired at various sports events I have attended where one or more of these was lacking
We always never have enough storage at a facility and outdoor lighting for spring and fall makes the fields more accessible to use year round for play
Players come first, spectators come second
Not in many fields much shaded area it's gets very hard in sunny days
In other fields around the city there is sometimes so seating available and during hot days shade would help a lot.
Evening games are always good and need outdoor lighting for that. Need proper sitting for players and other families so they can cheer up and enjoy games. Player need healthy food rather than junk food on site with normal price
It's seems like a logical layout.
Importance from top to bottom
Personal experiences from attending games and tournaments. But concessions and food need to be athletic and athlete appropriate
I ranked according to need of players as well as thinking future of game.
this is what I think is important

As a referee I find it aligns with SafeSport policies to keep parents and spectators away from the playing area. It also aides in keeping the floor clean.
The space ought to be shared not only by players but families and friends supporting players. Generally, should be accessible to anyone.
Necessary for health and wellness and to run a facility
Because you need seating area for athletes and spectators. Also storage is important for keeping equipment safe or day use lockers for athletes. Concession and meeting rooms are not so important because there are food vendors close to the facility.
Because the needs of the person who is indulging himself in these activities needs water if there thirsty and shade if it's really hot outside
Player Priorty First
More of playing activity than others
We should be able to host large tournaments for volleyball.
Because I believe these are the necessities for indoor sports.
Importants
People need a place to watch the games or practices, you need to be able to see to play or watch the games
Food trucks could be a better option
We need storage so I don't lose any of my belongings as well a food area when I'm hungry after a sporting session and lastly a bench to relax between sets
Base on the needs of cricket game
These are all important things for allowing people to continue to play sports later at night especially in the summer time where there is more daylight
I ranked them according to their importance and priority.
Because you should be anle to sit in the shade and enjoy some concessions first and foremost at a game.
Lot of players and evening game would be great
Seating and food options are always an issue for the athletes
Because it is important to have family and friends have somewhere to sit and watch
That's what I have seen what's needed
Common sense
Necessity vs Want
because having a place to buy food and drinks is important in every sports complex
I didn't rank them. I'm against the complex when you can't even take care of potholes in the neighborhood.
Athletes are the most inportant part of the field. Focus should be on their needs first. Lighting allows longer periods of us which means more people playing.
These are all required based on our weather and sunlight schedule. The N.E. is very windy so it would be good to have sheltered seating for players and spectators

They r imp
For the players. As a mom who has athlete boys
As a sports volunteer I can assume these ranks is the best.
Setting is most important
I believe that we can support our ageing population by keeping them active with these not so physically demanding sports.
Bcz player and spectator need to enjoy full game with some seating facilities. Some elderly people can't stand to long
Most outdoor athletic complexes are designed to support competition events so prioritize e.g. seating areas/benches to shaded outdoor areas for casual users of the space. There are limited meeting rooms at the Genesis library which are often booked out.
Games priority
Because thats the way necessary things will get prioritized
n/a except noise, safety and security of people at night, and equipment and permanent structures
This is how I would prioritize if money is limited.
The order I placed these things in shows the importance if each thing for both the players and viewers
Based on importance
Lights is important for games in the evening and for the safety of people as well. Shades are as important especially in the scorching summer heat. Benches for players to rest.
Lack of these amenities in the area.
It's the best and only ranking.
Because they're important for all people attending the facility. Food isn't necessary as we have many options to eat elsewhere
Priority first
Priority first
Ranking would change depending on if it is an indoor or outdoor facility.
Players would benefit from shaded areas to cool off and ample storage so that many teams can use the space together.
Everything Need
Based on liking
shaded outdoor area coz weather is unpredictable. atleast kids have somewhere to hide if it hail or hard rain. outdoor lighting then we can utilize winter as well
Essentials
Most important part of a play area is its availability. Lighting can increase the time we play.
I am Hocky player
I know the sport
Outdoor lighting is important

If we want to have bigger events then seating for parents and grandparents is a must
This HAS to be a joke right? How is this benefiting my community in Skyview?? We cant walk or safely ride our bikes to this location. Further more, isn't there already a sport complex in that area??? Lost my vote sir.
Spectators create a family and community feel and drives concession revenues.
We want for players to have benches and for spectators as well
That's just my perception.
Best of my choice
If I could rank them all as 1, I would. They should all be mandatory. This needs to be better than what was built for Cavalry FC.
It's important to have food stall and shaded area where sports are being played.
Outdoor field requires lighting, plus it Will give opportunity to play after work
Need for player
Due to extended hours in the summer I would love to play in the evening/night.
Shaded areas and lighting are important because of severe weather conditions in Calgary.
We need public to watch these games
Basis priority for residents nearby
players health &safety should be #1 priority. players need something to drink at the end of the game. lights help players and spectators see well at night
Its very important to ppl come with players and enjoy the game .
Prioritise the way i would
Soccer player who always wanted things like this
I did what I think best but still pissed ypur taking away green space
I selected what I like to look for in the facilities when using them for sports
I think it's obvious that people want to watch
People to watch and enjoy is better than meeting rooms.
Outdoor lighting is the best option for the times in the summer and spring and fall
Cricket will be best option, especially indoor cricket stadium so that people can play during winters
My ranking will make no difference
If the goal is to make the facility a national / international venue to host events, then you need to have the basics, which are professional facilities (hence seating for players), good spectator seating for parents / media, meeting room and spaces for o
Seating is good for people . Shaded area is good for sun .
Need most
Experience at current facilities
My thinking was around what's good for those partaking in the sport vs. Those watching
Place to sit and watch allows for socialization
NA

As a player it's important
Just thought of what seems most important.
Seating is important
Most to least i ranking
Put players and parents first. Shade and protection from wind is often over looked
Global warming! We need cool places to go
So you can have your family watch and have access to food
it's more convenient
That's the order of requirement. Most to least
I don't k ow
No particular choice
For outdoor space
Player-focused amenities are most important. And the lighting would be beneficial for safety and accessibility reasons as well
Functionality of amenities vs. Luxury features of amenities
I think seating should be the priority for the players as well as the audience. Having inclusive of the handicap seating is also very important
I think sports can be played well into the evening allowing for more teenager and adult time while keeping kids going earlier
We need it
Player experience has to be first, then followed by spectators
Specific factors such as the area demographics needs, ideal use, unique ideas to bring in different types of people enjoying sports (spectators), and bringing in safety and community.
because I focus on sports then selling foods and meeting rooms, this facility should be focused more on sporting activities as much as we can..
That's the way it should be
All needed more important
It's my view
According the priorities for the sport
They are important part of group sport activities.
Having people watch will really help boost engagement with the area.
Obvious
You limited my response. We need washrooms outdoors and indoors.
Looking at this from a sports team perspective
It would be great to use this facility for the local Calgary leagues
Experience
As a player, that's what I value
As per the need.
We need an indoor concession place including shaded area and the washrooms.

How I see fit
Just based on my personal experience while playing field sport.
That's what I feel about it
Areas for players is most important. Shade and cover from rain is a good idea.
Hockey field needs lights for night games and also need player bench for sitting and for coaches . These is also a requirement of shed at outside of the field for people
Top 4 is common sense as either player or spectator, these are important, 5-7 are just extra unnecessary things that is nice to have but not required to get field sports going
Seating areas should be there , also need outdoor lights to play night games
outdoor lighting gives you access to playfields for a longer period. Other items can be added over time.
Food is least important. Food trucks can always be brought in for events. Seating for players and spectators are #1, then lighting because that extends the hours of use. Storage is always short for anyone needing space for gear and equipment.
Na
Safety number one (lighting and shade), comfort number two (seating), and convience number three (food/storage)
Open fields cant be used year round. Lighting helps to provide more duration and bookable times. Spectator seating is important.
The needs of the players and spectators is first.
Based on necessity
Feel they are the most needed in this area
To make the facility athlete and spectator friendly. This will make it possible to host city, provincial and national events.
These are the most critical requirements for a sports field/complex. If you build it they will come. City's goal should be to integrate communities by building such facilities which will, in turn, lead to a close knitted community and external investment
Preference based on previous experiences
Because is make sense
Shade is key. Concession is a frivolous extra.
Players should be the priority as they bring the business.
When people watch games they will likely be hungry and players might need sports drinks. Washroom facilities would help.
Fields can be used all day
Because we always go play soccer at night sometimes and theres just no loghting not just soccer but a lot of sports
Based of requirements priority
Players need to take breaks in between the games.
Lights are essential to maximize usage. Thinking of player needs first.

In order of importance to execute a program to maximize field availability for lacrosse and comfort of players

If you answered with a preference above, tell us why?

Outdoors is always ideal but I understand the weather challenges in Calgary.

Indoor would allow year round use. Outdoor facility will be unused half of the year in Calgary. Weather. It is good to build for use and benefit of the users on a consistent basis.

Badminton can play only inside. Because of weather you can't play in open

Because it eliminates the Wind and other weather factors.

Badminton outdoor is not possible

These sports are generally outside sports, our winter weather requires that we build for indoors

It is real soccer outside

Field lacrosse has huge potential for athletes to play in US colleges on scholarships. More year-round facilities for field lacrosse would help greatly

That's tough. Weather is an issue here. Outdoor field lacrosse is the best but having indoor space to accommodate field lacrosse is desperately needed in this city.

Too much snow

Outdoor the weather conditions can be too varied, whereas indoor, other than driving to the facility, you don't have to worry about the weather conditions.

Playing on a field that can be utilized full year round would be advantageous for the city as it will allow sports to run more regularly, allow for games to proceed when weather is a factor such as rain, wind, hail, lightning, or extreme heat.

Outdoor turf gets hot, field can be dirty and weather impacts play.

Indoor sports can be enjoyed through all seasons

Soccer. Indoor turf preferred only because of the unpredictable weather conditions.

Unpredictability of Calgary weather and poor outdoor field conditions for most months

Weather. And we need more indoor facilities to allow for 11v11 indoor

Not affected by the summer weather (hail, lightning, smoke etc)

Outdoor is a fresh air and it is always better even if the weather is cold

It's warmer outside, BUT we need indoor facilities more than anything in Calgary

Soccer - to accelerate soccer development as I think we are behind and this is mainly due to space

Availability for both outdoor and indoor soccer is limited

Indoor as the weather can be so unpredictable in Calgary. Summer storms often impact games or cancel them outright

Soccer. Preference is summer play but we do play indoor in the winter months and fields much needed at that time as well.

Ultimate frisbee is more fun outside

I like the feeling better for playing soccer

Outdoors is healthier & enables a larger amount of spectators to view the sport
All season option, don't have to deal with the elements
Soccer is more fun played outdoors. Indoor is a good option for winter.
There are fewer months for outdoor soccer, so I would prioritize indoor play which could be used year round.
Soccer - Just build both outdoor and indoor fields for year round soccer
I prefer outdoor summer soccer
However, given variable weather in the summertime and winter weather a field house is very much needed. Especially for the growing sport of soccer. Access to proper fields is inequitable with certain clubs having more access than others.
Consistent weather inside. Driving all the way up north to have a game canceled by inclement weather sucks
For rugby, outdoors is preferred. An indoor space would enable a winter league, which would help to grow the game in the city.
In case of winter
Depends on the season, indoor for winter and outdoor for spring/summer and
Weather can be so unpredictable, indoor facilities make the playing conditions more stable and increase safety
i think saddle ridge is a horrible location and unsafe.
There are change rooms and weather doesn't affect the game. However, a full size field is much better instead of playing half size .
Calgary weather is so variable. Indoor venues don't have to cancel athletics for lightening, snow, heat, smoke etc.
Being active outside has a more refreshing feeling and allows me to concentrate more as well. Exposing the game to the outside environment also adds an extra challenge and variable which I enjoy.
Calgary weather unpredictable and not enough indoor fields
When there is an indoor option, weather doesn't impact game play
Weather conditions are always stable
For soccer, it's nicer to play outside - even when the weather is terrible.
Summers are short.
prefer to play outdoors, BUT this is not reality in Calgary - NEED indoor facilities. Always cancelled outdoors for rain, snow, wind, smoke, thunder, lightning etc.Also below about turf - prefer natural turf BUT city doesn't maintain fields so need turf!
Indoor fields have controlled environment and games do not get cancelled due to weather or other factors
Our weather is more conducive to indoor activity.
Calgary has 6 months of winter. We need suitable indoor facilities.
Games won't be canceled because of weather
Not weather dependent - a huge bonus in Calgary!

My son plays soccer because winters are so long here that's why they need indoor soccer field
Because smoke and the unpredictable weather in calgary does not allow for outdoor play
The indoor season for soccer is longer and the potential for having to cancel games does not exist. Revenue from rentals would be better for the facility with these conditions.
Fresh air, we are already inside too much.
Soccer facilities are dismal in this city. We need 10x the indoor space to accommodate all the soccer programs. We are so far behind Edmonton and player development is lackAn indoor space is a must for soccer. The weather is so unpredictable in the spring
The weather is unpredictable and more winter then warm weather
Soccer- we have winter 10 out of 12 months and gym floor is not suitable for this sport.
Prefer outdoors BUT indoors is essential in Calgary for year round use so it is more important.
Games are hover cancelled when booked inside. In Calgary hail is common in. The spring/summer. Also we can ply in the winter j doors.
The covered stand for spectators and players is very nesssry for the days when the weather is not good.
Much more enjoyable
Outdoor is better because the games are longer. Also, the awful playing surface at the soccer centre with the boards makes me never want to play indoor again. Grass is by far the best and doesn't cause cancer.
Soccer should be played outdoors when possible. Playing in an indoor field in the summer feels unnatural.
So that we can play sports all year round
Soccer. Indoor pitches are great but often lack proper size for full size 11 v. 11 games.
Because boarded fields are dangerous
Soccer is much more enjoyable outdoors on proper pitches even in colder weather compared to indoor tight spaces.
There is an extreme shortage of appropriate well maintained outdoor and indoor soccer pitches.
We have more than enough outdoor fields in Calgary
As a soccer player, I like playing outside it is a big part of summer games for me. However it is miserable to play in hot weather with no shade, it gets very uncomfortable. I don't mind playing in rain though as long as there's no freezing cold wind
I play soccer and indoor turf fields are ideal in any weather conditions.
Weather is not a factor
Seems more natural.
Like to be outside as much as possible
Many soccer events where out-of-town teams are coming are ideally scheduled indoors to avoid cancellations due to weather
The sport I coach is a outdoor sport but as I said earlier it would be nice to have another indoor facility in the city to be able to play this sport year round.
It's nice to be outside

Weather changes can influence the game in unexpected ways, enhancing the experience for players and spectators
Warmer inside vs. Outside
Indoor is more practical due to our weather
Outdoor is more cost effective and natural for soccer
As a team manager first and a "soccer mom" second, these are in order of priority for the needs for both roles.
I run a rugby academy and lack of space in our city
Because of the weather in Calgary is so unpredictable in the spring and summer. My daughter played outdoor soccer in 3 degrees in late June this year. So many outdoor practices get cancelled bc of lightning.
Soccer indoor turf fields
Consistent conditions, can play year round
I don't really have a preference. But indoor would allow soccer, and other sports, to continue in the winter months
Year-round option given the weather in Calgary
fresh air
There is lots of outdoor space in Calgary, we need full year indoor space
Outdoor soccer is a better game
More space
There are not enough indoor soccer spaces that work for both players and spectators. The lack of indoor dressing rooms and amenities at the current locations do not work
Weather dependent in Calgary, lotsOf games are cancelledD due to weather
We live in SW. There are plenty of outdoor options closer to us. We would travel across the city for use of an indoor soccer facility.
soccer
Season for Outdoor in soccer is much shorter and weather is often a hindrance to game schedules.
Soccer, indoor fields are much needed right now, not enough space for existing clubs.
No preference, just want the fields to be good. However with Calgary weather indoor options are good to have
Currently Calgary lacks ability for leagues to compete 11v11 or 9v9 depending on age group in order to accommodate more games with limited space as appropriate development field sizes for games is not available due to lack of fields mostly indoor winter.
I really don't have a preference, except that the city and community natural soccer fields are not well maintained. (Frank McCool for example) so indie facility space generally are better maintained.
More space. Current indoor soccer facilities are so tight. There's no space for throw ins and corners.
No need to worry about lightening and thunder

Weather is unpredictable in Canada.indoor play ensures no issues.
Indoor games always go ahead, even in summer outdoor games get cancelled due to weather. The outdoor season in calgary is so short.
Able to play 11 v 11 soccer
Playing outdoors is a more real experience. indoor season is necessary during winter months only
I chose outside, again, it should give us a chance to choose whether the game can be played inside or outside.
I love outdoor but our weather is so unpredictable. Many games are cancelled and there is never enough time for rescheduling. As much as I love to watch outside having a controlled field will assist many teams in actually playing regardless of wind, rain
True game of soccer. Indoor soccer is just a means to keep fit during the winter
I prefer natural turf, but unfortunately, our indoor season seem to be longer than the outdoor season and our children are in desperate need of more indoor fields/spaces
Love outdoor soccer
Actually both indoor and outdoor, pending on which sport is being played at the time. Box lacrosse or soccer.
Outdoor is better in my opinion as a player, as it does not require me to have a facility for personal training which closely relates to a realistic match scenario and is better for health.
Weather is so unpredictable and we have turf fields outside that with the weather changes I feel are getting ruined. With the weather changes games are rescheduled then causes issues. When indoors less uncontrolled conditions to worry about
indoor provides consistent conditions, no heat/cold, no bugs, no cancellations due to weather etc.
Choice is dependent on time of year. Additional indoor facilities are needed to support year round activities more than outdoor facilities, as teams can find alternate public spaces to play soccer in the summer, but can't do so in the winter.
Fresh air.
Calgary weather even in summer is suited best for indoor
Soccer is an outdoor sport not inside. Should be played on grass . Turf causes burns and injuries.
soccer
Indoor turf for soccer is uniform, not weather reliant and makes for a quicker game and a better surface to practice and train on.
Outdoor soccer is the best, but they need more indoor fields because of the weather in the city
Soccer
Need more indoor soccer fields
Consistent conditions, with almost no need to cancel or reschedule due to weather
often wearher in Calgary is unpredictable
Fresh air! Natural light
Larger field

In door spaces can be utilized all year round. Weather is never an issue
Outdoor fields cost less and keep fees down
The winter last around 6 months in Calgary. Calgarians need a place to do sport for the long winter.
Professional soccer is played outdoors.
Had to pick 1 both are needed
Soccer is played outdoor except Calgary.
A well maintained outdoor soccer field is more pleasant than an indoor one
Outdoors is more dynamic outside of the weather
Indoors is climate controlled so is best
For weather
better experience
I prefer to play in the spring when it is possible to play outside
weather elements
indoors removes weather and bugs from the equation
Field lacrosse (mixed and women's). We'll play as long as there's no lightning, and it isn't excessively smoky. Artificial turf is more consistent and doesn't get beaten up as easy which is preferable for tournaments.
blue sky
i believe you will get more interest if outside fields.
weather dependent
Ideally, if we had proper artificial turf that could be covered, that would be great.
We have limited access to get on the indoor pitch at Shouldice.
outdoor is just better for community - we have the Genesis Centre do we really anything more than more free open to the community spaces?
indoor is restricting, however a necessity when 6-7 months is too cold to play outside
One can play anytime of the year given Canada weather
Outdoor for fresh air and to love the nature
Sun fresh air noise dispersion
We have winter for 6 months or more. Space is useless for more than half a year
Calgary weather is a factor. No turf needed.
Need both indoor and outdoor for winter and summer
Fresh air
Because of weather it will help to play all year around
There should be both indoor and outdoor considering the weather and seasons in Calgary
Our sport is best played indoor
Hockey and soccer are being played mostly in Canada. So indoor and outdoor grounds are required according to weather conditions.
Weather has less opportunity to impact when it is an indoor field

With an indoor track this would allow us to train all year round and seeing how we have bad weather for majority of the year snow and cold wet weather , it would make the facility more usable to athletes on a year round bases.
Indoor due to allergies and the weather being so unpredictable
Because weather is very unpredictable in Calgary when we leave houses it's summer and when reaching in field it's winter
I like playing outdoor but when it snows having a good indoor field is important for practices and games.
Tennis
Outdoor is good for summer and indoor for winter. In winters kids stay home so in summer we want go outside and play with our kids
I would hope tennis courts are built for the community
Play all year round
Both are preferable
Indoor so I can play all year round and keep myself fit.
Need courts for volleyball!
Outdoor games are good for health and mental wellbeing.
fresh air
We have our share of indoor facilities in the NE. We should strive to have balance for outdoor facilities that cater to sports that we typically play indoors.
Less wind and longer season to play ultimate frisbee
Calgary weather can have four seasons in one day!
Volleyball can only be played competitively indoors as well as basketball.
Outdoor is better because it helps athletes who train in these sports get used to the conditions they will have to face
Cricket played Outdoor
since the weather in Calgary is cold so prefer indoor so my kids can make no excuses.
Love volleyball and prefer indoor to beach. Prefer beach, however, to no volleyball.
Calgary's weather is so unpredictable so having a facility where people can play/watch while protected from the elements is ideal
Hockey is best played indoors
We have winter 10 out of 12 months....
Alberta is not the best province for weather and the changes in weather an indoor space would be the best possible scenario for all conditions.
Personal preference.
We can play better indoor
Allows for a sport to be played year round instead of seasonally
Players like/love to stay in shape and being able to practice all year long
Cricket is only fully played outdoors

Outdoor sports activities is a limited time opportunity during year
Nature
because i dont get sunburnt in the summer
I am using these type boxes because you are asking questions only relating to the amenities in the complex. Not whether people actually want it or not. Another bias.
No preference but indoor is important considering how short our summer is.
Field hockey needs a good turf. Indoor can be played on a gym floor
Calgary has too many seasonal elements
Enjoy outdoors on a turf field that is not full of dandelions and less risk injury
Indoor will allow all year availability for teens
Calgary weather is always unpredictable. Outdoor events are often ruined by strong winds, rain or snow.
Soccer or basketball are one of the famous sports among young calgarians. So both can be played inside or outside but considering harsh winters in mind. It is good idea both sports played inside even in the harsh weather.
Indoor due to winter conditions otherwise do like outdoors as well
I believe that a sports complex should cater to a diverse population.
Outdoor and indoor both are important bcz indoor in winter are great but in summer Outdoor sports activities are healthy and enjoyable
disc golf is an outdoor sport and I love the outdoors. However, I do play several indoor sports but Free community access is generally not available e.g. a space to play floor chess like at the Central library downtown encourages community engagement.
Soccer, tennis
I love to play both but we can play indoor in both seasons like winter and summer
personal I was thinking it would be a building rather than fields, and a swimming pool
So I can play in winter.
I prefer playing outdoor as for soccer it is critical that you are able to play in any conditions, it helps you get better at the sport as your able to endorse more than just being outside many soccer players are used to playing through rain, wind, etc
Both indoor and outdoor
Indoor to get fresh air while having fun playing games.
Like to be outside when we can.
It's just easier.
The field house is needed during the 6 months of winter
For the summer activities
So players can play all year long
Field hockey depends on the weather conditions outside
I picked indoor but it depends on the sport. I believe there is a lack of indoor field space in Calgary given our climate.

Spaces for dance practice would be helpful for community members who are looking to form groups. A versatile indoor space can also support volleyball/basketball intramurals!
Field hockey play outside
Because of the weather
Indoor facility can provide year long opportunity to play.
calgary weather is unpredictable. indoor will generate good revenue for city plus keeping people active.
Calgary's weather is too unpredictable for outdoor only
both options are better to have
Want a hockey field and outdoor is the best place to play it
Becuse wenter time we can't pay outside .
The sport I choose is meant to play outside
Field hockey is played on turf which will be watered and it is always outside
Turf sports are meant to be played outside
Calgary has inclement weather in fall and spring so indoor facilities would be used more
This HAS to be a joke right? How is this benefiting my community in Skyview?? We cant walk or safely ride our bikes to this location. Further more, isn't there already a sport complex in that area??? Lost my vote sir.
I play tennis and indoor courts are best due to the longer colder seasons in Calgary
Indoor when weather conditions are unfavorable.
We play indoor and outdoor soccer but it's always a challenge to get a good time slot with the indoor fields. They always give us the crappy hours.
I believe we already have few indoor Gymnastics. The outdoor one with proper seating and arrangementis much needed.
Soccer as we have short summers
Weather conditions are unpredictable and many teams need to have an option to switch at the last minute.
I would rather have both but keen to have outdoor facility.
Badminton and basketball for winter time
Inside facilities can be used for community social activities/services.
Indoors are preferred to avoid any cancellations due to weather
Running , walking tracks
Because cold weather is longer
i like playing soccer outside. fresh air is good to have
Cricket soccer and field hockey are the outdoor games
soccer is an outdoor sport
As that what ypu do more buildings less trees gree space duh oxygen

The weather is very unpredictable and outdoor games are canceled frequently. Smoke, rain, thunder and lightening. It is also very windy a lot of the time.
Lacrosse
An inside field house can be utilized all year round.
It's called winter
Less artificial turf that could cause cancer.
Winter with snow and ice coming in the fall and spring is why. There's no point to invest if this place is only seasonal.
Cricket will be best option, especially indoor cricket stadium so that people can play during winters
If you can put a velodrome for cyclists around the infield would be nice. If you have extra money and if the mayor and council don't get another raise, how about a curling rink in the NE, 6-8 sheets. I hate driving to the other 3 quadrants of the city
Soccer. Most tournaments (11 a side) happen during the summer months, however it is important to have an indoor backup in the event of deteriorating weather conditions. This is typically a main consideration for event organizers.
Indoor , we can play in winter too
Weather in winter
The time you can play indoors is way more longer as per Calgary's weather
Calgary weather
I play rugby. Having an outdoor space is preferred because of the season in which we play. It's be great to have both due to Calgary's short summers.
Fresh Air
Indoor allows for year round use
The weather changes in Calgary are drastic and need to consider for both times when it's super cold and super hot. It would be nicer to have all sports places indoor arenas as they can facilitate activities all year round.
More natural
Calgary is mostly cold weathers. So it's important to have more indoor facilities
Weather conditions 8 months snow 4 months for summer only
Roller derby has to be inside
We live in Canada and there are more bad weather days than good
Climate control
Indoor surface is better for all year round play
it's mostly snow and weather is unpredictable
I play badminton. It's nice yo be able to play outside in fresh air. Yes it's hard sometimes with the wind but with the good weather prefer playing outside
If the facility is indoors it's available year round and not weather dependent
Idk

It's a team sport and based on weather indoor will be better
Basketball for indoor Cricket for outdoor
Being outdoors in the nature is fun
There is more months of cold snow and rain in Calgary than hot summer days. This would give access to all year use.
Keeping in mind Canadas weather conditions, we need to have our kids, youth and adults to enjoy the sports all year long
Climate controlled environment (air conditioning)
Calgary has most seasons snow, rain or wind
Weather
There should be place for both indoor and outdoor games. At least we will have option in winters to use the indoor area for the numerous sports instead of no use of open field at all.
For our kids we need this in all weather
Soccer, indoor spaces can be used all year round
I enjoy sports outside personally and the sports I play can easily be accommodated to indoor/outdoor.
Being in Calgary weather is the challenge and father of young kids, being player myself,I want everyone should have year around opportunity to play without any restrictions.
Outdoor is always better than indoor
Because of weather
Indoor will allow me to play all 365 days
So kids can go close to nature. In Calgary in winter they are indoor most of time so in summer I feel like they need some outdoor activities
I'll prefer indoor because the Calgary unprecedented weather won't be disturb play.
Soccer is a year around sport. It would be nice if these 3 soccer full fields can be in a bubble like Shouldice to play in winter as well
Fieldhouses will be more useful hiven the weather conditions in calgary. (Long winter, turbulent spring and summer).
year round inside is better
Basketball is more on an indoor sport and can be functional for use throughout the seasonal times like winter. Currently, Don Harman Sportsplex carries a huge capacity with basketball.
365 day a year access.
Weather dependent and indoor it is easier to accommodate when planning in advance. Indoor typically has washrooms .
Outside is so much more fun, its more open but unfortunately we don't have a lot of nice days outside so when you can make use of the days you can go outside, that's always fun!
Year round accessibility. Calgarys weather always changes and that has an affect on the group. Indoor turf works year round.
Not weather dependant

You can play year round with indoor
Due to the weather conditions keeping indoor facilities would benefit people more ultimately
With the kind of weather we have, an indoor option is the best.
Fresh air and sun
Cricket is an outdoor sport.
I like outdoor as well in summer. But I prefer indoor because Calgary has long winter so it is not possible to play outside for long time.
Outdoor fields are bigger
I am a Field Hockey player . We need outdoor field hockey ground for better and actual hockey . We have indoor field already in genesis so its my opinion that wee need a outdoor proper turf for Hockey's bright future
Climate controlled, amenities like scoreboards and washrooms/change rooms/shower
We need to play outdoor as well.
we play indoor 6 months of the year, need outdoor fields when its nice out
One word. Winter. Outside is better but our season is too short.
We played cricket in school years and it used to be outside only
Fake grass has been linked to dementia.
Ball Hockey. Needs hard surface, usually unflooded ice rink. There are no permanent ice rinks north of Martindale or East of Deerfoot Tr. There are already plenty of cricket pitches across Ward 5, with baseball pitches being converted
Outdoor playing is paramount. Given our winters it is just as important for indoor playing.
Because outdoors is better
I play box lacrosse. Lots of other facilities have under-sized dressing rooms and player benches. Spectator seating is often uncomfortable and offers poor sight lines.
Outdoor is more accessible
Outdoor in the Calgary summer is a treat but we also require closed facilities for cricket to have competitive sporting events.
Usually we have 6 to 8 months of winter so Indoor playground is necessary for optimum use.
Outdoor conditions year round are a bit of a limitation on usefulness
In summer cricket is played outdoor, in winter cricket is to be played indoor
9 months we have snow is not easy to play outside
Outdoor sports build stamina
Soccer. With the unpredictable weather of Calgary it works out better for my group to play indoors all year round.
The weather is always unexpected.
We need indoor tennis. Currently there is no indoor tennis in north east. All indoor tennis are in south. There are many tennis players in different ages among asians especially Filipino, vietnamese and other ethnicities. In our group we have 100.

Usually outdoor fields are bigger. As there are not enough indoor fields to accommodate all parties, teams have had to play on smaller fields during the winter.
Because of the fresh air and you really get to enjoy the weather
Can be played in snow weather as well
Make sense due to winter months
Soccer. Indoor would be useful during the winter as well.
I play badminton which is an indoor sport.
Winter
Year round usage
We are an outdoor sport and prefer outdoors.

What amenities (i.e. showers, tables/chairs, team huddle area) should be made available in team rooms and why?
Whiteboards for tactics, power for computers
Benches would suffice. these are athletes we are talking about, not CEOs of corporations.
Just basic lockers will be fine.
Showers, lockers, benches
all
Showers
Showers are crucial, especially for older players. Shaded team huddle areas would be amazing.
.
Showers, toilets, change rooms should be available because it's nice to have a private team room before a game.
Toilets, sink, showers, water fountain and locked change rooms, seating, and Hooks for jackets, or backpacks. These are all literally basic amenities other sports complexes have and make them more attractive to players, renters, and organizations.
Places to place your bags and sit, whiteboard for discussions, bathrooms and shows.
Tablets/Chairs - Again for everyone to enjoy not just people plays sports
Seating, hangers for clothing, bathroom
Benches, huddle areas for teams
tables/chairs, team huddle area
Washrooms and showers
Chairs/ benches, hooks for coats, lockers, white boards for coach demonstrations
Lockers, seats, water station, bathroom and showers. It makes it easier to be ready and relaxed before a game.

Showers, dressing room benches with lockers above each cubicle, folding tables, magnetic/white board for teams to talk, mirrors in the dressing room washrooms, proper ventilation of the dressing rooms, 1 ice bath tubs in each dressing room, medical ro
Washrooms and benches
Lockers. Showers. Chairs. To allow players opportunity to get clean and talk after the game.
Team huddle area good team building opportunities
A team huddle/gathering area is great for getting ready before and after games. A separate change room where the team can store their gear during a match would be a huge benefit.
Place for meeting previos game .
An indoor space for team huddles in the winter is a priority. Macron soccer centre lacks these and it's makeshift trailers for the teams.
i think saddle ridge is a horrible location and unsafe. high crime rate
basic benches and/or chairs, as well as whiteboards or facilities to talk strategy
Chairs/benches, hooks
Showers and hooks and benches are all we really need. A whiteboard is nice for coaching.
Chairs and lockers to hang/store equipment for the duration of the game would give the feeling of a club room would be a nice addition to sports in Calgary.
Changing room and warm up space!!!
Storage space for coats and bags, washroom, facilities, and benches for sitting
A bathroom/toilets, a private changeroom, benches and a whiteboard for the coaches
To demonstrate seriousness of sports, related amenities must be provided so that the facilities will be used.
showers, change rooms
Benches, hooks, washroom/water bottle refill station and ability to lock the room while the game is occurring so the items are secure.
washrooms. No one showers at these facilities (maybe adults). Children do not.
bathrooms
team huddle
All of the above.
Chairs so players can get equipment on
Showers because often after playing sports, people smell.
is this necessary?
Lockers, chairs etc
A table to display snacks like bananas and granola bars for energy for the players. Also incase of injuries if a player is in need of a massage they could lay on the table instead of the dirty ground.
Chairs and change rooms only
toilets, water fountain
Chairs or benches. Don't put a ton of money into things a small percentage of people will use. Spend wisely maximize the spending by ensuring it's going towards a top notch field space

washroom, benches, showers
Inside locker room there should be seating area and washrooms.
Storage and suitable white board presentation areas are important for pre and post game chats.
Showers, benches
No they are not a necessary item and the money can be better spent elsewhere
Dressing rooms and showers
Showers and water fountains
Benches, chairs, bathrooms.
Places to sit and a bathroom in each team room.
Showers, dressing stalls (not lockers but place to put clothes), whiteboards in locker room large enough to project onto.
Toilet access
Team rooms, for different sports and teams
Washrooms, showers, changing areas.
Toilet facilities are a must - porta loos are disgusting and unhygienic. Soccer players are not going to progress if constantly having to play on split pitches.
Just rooms. Bathrooms can be shared.
We've never used meeting room showers once in our lives. Mirrors are appreciated as well as benches, also a structure that's not a big open room but a little more separated so its more privacy if we're changing
Change area, toilets, sinks, big mirrors, white boards for team planning, first aid kits, water fountains.
Seating & white board
People tend to use showers less and less. Team huddle and board.
I don't think showers are used much so not worth the cost. Just benches in team rooms.
chairs to be able to sit and discuss with the payers.
Just bench's to change your footwear
Some form of large format wall mounted presentation, whiteboards become not white too quickly
Showers and huddle areas are important
Locker rooms
Showers and team rooms.
Huddle area that is an open area for times when "rule of two" can't be accommodated due to staffing and volunteer shortages. i.e. Many moms are team managers for boys' teams.
Don't need showers.
Showers, huddle space, audio visual
Chairs/seating, hooks to hang up gear
Private meeting space with washroom
lockers, tables/chairs/benches

Washrooms, huddle area and changing rooms
chairs for athletes to change
Washroom, showers, whiteboard
Showers and seating
tables/chairs, video analysis capabilities, food station with sink for team meetings.
Toilets, lockers, seating, water bottle filler, water tank filler, electrical outlets,
Showers and benches
Benches. Toilets. Water fill station.
Showers, toilets
team huddle areas are perfect, showers unnecessary
Seating, white boards, washrooms/change rooms. Some teams have opposite sex coaches and players
Sinks/ toilets/ Team huddle area
All listed above. Especially team huddle areas. The shouldice dome has no places to dress or have a team meeting
washrooms and benches at minimum.
Washroom. White boards benches
Chairs
Huddle area and chairs to support team
team huddle area, bathrooms, benches, white board
Seating for players and whiteboard for coaches
Tables, chairs, huddle area for pre game planning
Team huddle area where team can chat before and after a game. Should have benches so that players can change/sit when meeting with the coaches
Benches/ tables- music, sinks, hooks
Showers, tables , chairs and team area
None
Team benches around the change room, bathrooms, showers, big whiteboards.
Huddle area and change space. That's what it's mostly used for.
Bench seats, shower, bathroom, open space
Bench to sit on while changing and hooks to hang jerseys/uniforms. Locker rooms should be big enough to accommodate teams with large equipment bags per player.
Team talk area, meeting area, private meeting area, storage and washrooms are a must. Anything extra is a convenience.
Locker rooms, don't necessarily need showers but washrooms and space to get ready. A space to warm up if playing in winter so your not going on the field cold and have 2 min before playing. A space to warm up and reduce

no showers, team huddle area - ability to keep bags in the locker room while playing. often youth teams are not allowed to keep their bag, outdoor jackets etc in the room. white boards and lots of water filling stations
minimal facilities should be required. change rooms with seating for players would be nice, but don't need full showers for this type of facility.
Showers, benches, hooks or lockers
team huddles area great for pre-games and post-game chats.
Chairs/benches washrooms.
Toilet and sink. You can shower at home.
Toilet and team huddle area
Washroom or changing closets; combination day use lockers; mirror; lots of hooks; garbage cans
Team huddle areas
team room / huddle are for team bonding
Showers and chairs needed for teams
White boards, seating areas
Bathroom, it's all that's needed.
Shower will be nice.
Chairs and washrooms definitely needed. Everything else seems as a nice to have at least for soccer.
Bathrooms. Showers are seldom utilized
Seating
Tables and benches for changing
Lockers or hooks for clothing, showers, table for coach meetings
All of the above
showers, washrooms, team huddle area
showers, chairs
Showers
benches to change at as well as water fountain and bathrooms with running water,
showers, benches, bottle refill station, lockers, (tables, chairs, projector screen, window blinds, kitchenette - esp if a boardroom and not team room).
showers, seating for teams is for cleanliness
benches, lockers, showers (lockable cubicles), team huddles area, white board, clothing racks (for winter jackets), boot trays.... Consider a multifaith prayer room
Bathrooms/change rooms, place to huddle during inclement weather.
We will need team rooms, change rooms, referee rooms
Bathrooms would be good. Change rooms. Locker and storage spaces for clubs and teams would be helpful.
Locking Door, bench seating. large enough to accommodate 20 adults (bathrooms/showers can be shared)

Showers , lockers
Table/Chairs and long chairs for players to rest
Showers, benches, team huddle area - this allows for team members to get ready and build morale together
Showers, table chairs
Tables/chairs/locker/showers
Tables and team huddle areas for stretching and meetings.
It will help to refresh players
These amenities are not necessary
Shower
Showers (individual)
Showers, lockers, and benches. These are for accessibility
places to sit and toilet and sinks.
Benches, white board and washroom
Chairs and a team hurdle area along with a bathroom and a big whiteboard.
Shower needed after games, lockers with pin code for players to put stuff safely
Shower for sure
Showers, Team huddle area, whiteboards, and wall space to project plans are important if we want to hold international events.
Kids need downtime. Teams need a secure place to be when they are at a location all day
Chairs
White Boards
Showers, tables and chairs, benches
Showers do not need to be in team rooms but it can be provided in change rooms but tables/ chairs or benches like a swimming pool change room has, will be good. Washrooms inside change rooms too.
Water fountains for water benches for resting
Shower and Chairs
Showers, Table and chairs.
Shower, toilet, sink, huddle area
Team gathering area with places to sit. Teams meet before games and practices and need a place to gather
Showers, lockers
Showers, I don't want a space I spend my time to be smelly with football players
Yes, since this is the norm for national games.
Tables and chairs should be available. While teams are waiting, there should be some place for them to wait and relax
Showers, tables, chairs, whiteboards
Chairs and tables, showers, lockers and team huddle area.

Tables and chairs, huddle area
Private showers/lockers/seating
Drinking water, Tables and chairs
All of the above
team huddle area and tables and chairs
Bathrooms that r clean
Yes! For convenience and for athletes
Chairs and tables/seating (meeting rooms within team rooms), team huddle area but that is not just occupied by one team
Covered expectator sitting area
Seating area and showers need to be provided. Showers and washrooms is the basic need for the sportsman
Table chairs, would like showers but maintenance for cleanliness and privacy is needed and need to be enforced
Showers lockers
Tables and Chairs, it can form bonds and we can later have stronger connections and community
Need change room , proper washroom, it's important for people to stay more longer for sports. Some fast food shops or ice cream place will be nice
To be fresh
If everything will be included that will worth it.
couldn't care less if it doesn't effect traffice flow and keeps kids out of trouble
Showers, locker rooms, toilets, urinals, water fountain. These are basic needs
Chairs and team huddle areas should be added to team rooms
Showers , table chairs and huddle areas coz it's important to keep players hygienic
Showers, chairs and tables
Shower but not in change rooms to support multi gender teams
Showers, benches
Just do everything.
Showers because ew without
Showers ,chair , table after the game meeting and fresh up for showers
Seating benches for player meetings and wall hooks to hang jerseys
Benches and hooks for players to keep equipment
Benches, equipment storage
Whiteboard to discuss strategy, first aid
Everything
Yes, when we have two tournament here, then we need separate rooms for the teams
Comfort
picnic benches are enough. showers are not nececcasy
Seating for the whole team

showers, table and chairs
Showers - sometime due to lack of time player. Player have to go to work after game
Becuse we need those staff
Showers for players
Showers, chairs
Showers and reasonably sized change rooms
This HAS to be a joke right? How is this benefiting my community in Skyview?? We cant walk or safely ride our bikes to this location. Further more, isn't there already a sport complex in that area??? Lost my vote sir.
Showers
Basic and much required amenities.
Showers,drinking water,storage,lighting,benches
Needs to be able to host large tournaments and near pro level events like Cavalry FC or the new Women's pro team.
Showers, huddle room and storage space big tournaments
Shower, table chair for player
Yes, you need a shower after game and table chairs can be used meeting/gatherings
Tables and chairs for seating and organizing short events
Outside sitting to encourage kids
So it can be convenient for residents to become more physically active for health and mental reasons
shower, huddle area, chairs, tables, whiteboard with markers.
Showers, lockers tables chairs etc should be there as they are needed for this kind of ammenties
all of the above if possible but not really necessary. just good to have
Don't give a shit
Toilets and benches.
Tables and chairs would be great for players to put their items on vs the floor, Spectator seating would be great for people who come to watch the game.
Not sure.
Showers and lockers with team only entry to avoid theft. Possibly a meeting room within to allow for strategy and team meetings.
Tables and Chairs
Cricket will be best option, especially indoor cricket stadium so that people can play during winters
Na
Showers
Showers are good . You can relax
Washroom
Everything what's available in a sports stadium.

Lockers for clothes
Showers, different size lockers, accessible areas, m for those with limitations (disability or even an injury), hair dryers
Table
Benches and locker booths
Showers
Showers
Tables, chairs
Showers, 💎
Showering would be nice
tables and chairs meeting
Showers for the players that can be used after games.
Space for warm-up is more important than team rooms
Shower
Not really
Showers
Showers
All the above mentioned are needed
Showers, white board,
Change room
Shower
Washrooms
All amenities
Showers, tables/chairs. Benches, team storage. need amenities to meet provincial and national competition standards
Tables/chairs, team huddle area
we can have international games here in Calagary if we have all required amenities.
Showers, lockers and storage space for players chairs and benches for players and officials
Which are necessary needed
Tables chairs, TV or screen with projector
Water facility to drink
Team hurdle area, tables/chairs
Chair
Boards, chairs
Chairs/benches Tables. Showers are not necessary and wasteful.
Whatever can be supported would be ideal, but a change room would be the most ideal.
Shower and change room
Showers.
chairs, showers, water fountain, a space for team huddle outside of locker rooms

Showers , steam room , exercise room, kids play room
Showers, bathroom and benches
Lockers, benches, washroom
Lockers and sitting.
Separate Showers (not in team rooms) may be a good idea (something like YMCA) for the teams to freshen up.
Bathrooms for sure. Kids can use before their gamez
Good seating, showers
Lockers, gender neutral individual showers and toilets, seating and wallboard, projector screens and motivational quotes from top athletes.
Showers would be great
chairs , tables
All
Showers, tables, chairs, water fountain, these are basic amenities for any team room
tables and chairs are a minimum. Showers is a nice to have addition
Showers.
Table/chair, seating area, shaded area, washroom
The above is good.
Showers, benches and team prep areas.
All
Showers, athletic taping area, and team huddle. No tables and chairs too dangerous.
Showers huddle area first aid area
Showers, but with good privacy for sure.
Showers, tables and chairs
Showers
Showers, lockers, chairs
Showers. Coaches Room, White Boards, Freezers for ice packs, built in Bluetooth speakers
We don't need all that. Focus on the important aspects which is a nice and safe natural grass with lights and some indoor fields. Priority is key for the increasing population we have now.
Tables chairs and showers
Huddle area, electronic equipment like projector , white board
Table/chair only
Team huddle and washrooms. Easy maintenance for cleaning
Depends if there's space for all these amenities. Please don't make it claustrophobic. Showers to shower, change rooms to change, pool and/or hot tub for leisure and sports and make more money of this place.
Day use lockers. Big lockers. Washrooms. Showers. Water fountains. Tables. Chairs.
Showers

Showers, private change rooms and a team huddle room because cleanliness is important and it would be really cool to see a team huddle rooms
Showers, table chairs
Table chairs
Seating, lockers.
Table/ chairs
Swimming.
We require washrooms for fans, coaches and players. No additional amenities.

What equipment (if any) should be part of change rooms?
FIRST AID KIT, AED ETC, SHOWERS ARE NOT EVEN NECESSARY.
Lockers ,personal changing room , washrooms and maybe shower.
Benches
toilets
Washrooms and a sink
Showers. Storage. Benches. Washrooms.
.
Toilets, showers
Help button
Whiteboards and water bottle top up stations.
NA
Seating, hangers for clothing, bathroom
Whiteboard, benches
white board
Basic benches and hooks are needed
Benches
N/a
Projector (not essential) but would be nice if you're planning to host national games
Water fountain
Gender neutral changing facilities
Benches, hooks on the walls
Not much needs it
Seating/benches for players.
Whiteboards
Washrooms and showers in the change rooms.
Benches and hooks for bags
Benches and hooks to hang coats and bags
some private change spaces

Benches, sinks, lockers,
Benches, hooks, waterbottle refill, washroom, sink to wash hands
washrooms. hangers, lockers.
White board, benches,
benches, lockers
Lockers. Theft is rampant in many Calgary facilities. My son has had items stolen.
White board and hangers
Benches
benches, lockers
Foam rollers, ice freezer, and sports tape.
Water fountains? I don't think showers are necessary, they're expensive to upkeep and easily damaged.
bench
You do not need showers, spend money on things we need
None
Lockers for storage.
Benches, white board
Toilets
NA
Whiteboards
Whiteboards.
Bathroom and hooks
Whiteboards mounted on walls. Player changing stalls with hooks and cupboard area for clothes and gear.
Toilets and sinks.
Benches
Mirrors on the walls, pads and tampons available
first aid kits, ice, water
Seating & white board
Whiteboard. Hooks.
whiteboards and chairs or benches.
Showers are not required
Not single long benches, a variety of options, some people may require more privacy than others. Consider acoustics for hearing sensitive people.
Bathroom
Private Area
Benches and bathrooms
Bathrooms, med bench
Lockers

Basic amenities for a sports team
seating
Frist Aid Kit, Treatment Table
benches, hooks, washroom, whiteboard
Water refilling station.
Coaches white board, hooks/cubbies
benches
Water stations to fill bottles
dry erase boards, benches, table.
Toilets
Washroom
bathroom
Water fountain
Toilets, lockers
Hooks, mirrors,
Lockers and separation of gender
Team benches
Benches and hooks
Seats or benches.
Benches, hooks, washroom, large whiteboard
benches, lockers toilets
benches / stalls for players clothing
None
No equipment
Keep it cheap and spend the money on the pitches and playing areas/equipment.
Cubbies, lots of hooks and shelves; sturdy equipment and bright and easy to clean/disinfect
Lockers /cubbies / hooks / water filler
cha=irs
Lockers
Benches , white boards
bench
Chairs or seats.
White boards
Bathroom, racks, hooks, windows
Coaches board
seating
Benches, lockers
chairs and tables
drinking fountain bench to sit on and change

Showers (with door/curtain), toilets/urinals (with doors), benches, lockers (bring own locks or coin pay - like city pools), wall-mounted whiteboard for team talk.
benches cubbies for clothing
S A F E T Y. if shower provided, Individual shower cubicle should be available.
Bathrooms
lockable storage for personal gear
Benches and lockers.
Hooks to hang clothes/equipment. garbage can.
Lockers
Benches/sitting area. Lockers
Lockers, sinks, changing areas
Lockers
Lockers and toilets and sinks.
Some stuff for keeping clothes
Strategic board, locker and benches
Lockers
Storage racks
Showers
places to sit and toilet and sink
A place to sit
Dirty clothes area with bucket
Keep it simple..people can shower at home. If schools have taught us anything showers are the most underutilizes rooms. It's maintenance fee is unnecessary.
a variety of stainless steel hangers, wardrobes and lockers for quick and simple storage of personal and work equipment, be it aprons, helmets, cleaner's equipment or personal belongings
Lockers hooks
Bench and storage
Nothing is necessary, people can change at home.
Lockers and metal benches
So after your done you can clean up
White board
lockers, bench
Lockers
Benches
Showers
Lockers
Drawing boards/ dry erase
Sitting options, Hangers for clothes
Additional stalls in women's

lockers mirrors benches and showers
Lockers
Lockers
Showers,storage, washrooms
Lockers
Double locks
Lockers, private rooms for changing clothes
Mirror showers
I think there should some sort of drinking water taps available.
locks and supervision
Enclosed showers.
Don't need anything most players are just going to change but showers would be nice
Lockers
Lockers really all we need isn't it.
Water bottle fill station, upper storage (not locked, as long as the room has a key). Toilet and shower.
Wall hooks and seating benches
Benches and hooks for players to keep equipment
Bench, storage space (especially if there is not enough locker rooms like at the soccer centre annex building.
Lockers
Washroom and showers
Lockers
Sitting seats , showers and separate washrooms
Weight machines
Toilets, showers, benches, hooks
This HAS to be a joke right? How is this benefiting my community in Skyview?? We cant walk or safely ride our bikes to this location. Further more, isn't there already a sport complex in that area??? Lost my vote sir.
Washroom
Basic
Lockers
Locker room
NA
Lockers
Storage
Only Soap and shampoo is ok
Showers
Hooks & cubby's/lockers

Don't your running my city
cubical, washroom, showers, lockers
Not sure.
