

# Verbatim Comments

## Concept #1

- how about just leaving it as is? Most of the needed and suggested features are already there.
  - Community garden
  - Larger skating rink with berm to control flooding
  - larger ice rink with berms for easier flooding, no boards
  - off leash dog park
  - Pickle Ball courts
  - Splash Park for kids
  - Keep the ball diamond
- 

## Concept #2

- Community gardens
  - gathering area with firepits
  - Larger skating rink with berms to control flooding
  - larger ice rink with berms for easier flooding, no boards
  - off leash dog park
  - Splash Park for kids
  - Keep the ball diamond
- 

## Additional Comments (online & in-person)

- You don't say how deep this hole is going to be. How is the park going to change physically? This work is unneeded and a make-work project. During the 2013 flood, there was no accumulation of water in this park.
- People just want a simple park. If you paid attention on how it's currently being used, people just sit in the park and enjoy the grass and relax. No topographic depression, just grass, a few trees, a flat surface with a few park benches, pretty much the same as it is now.
- More trees around perimeter
- --Basketball Court!!!!!!!!
- Yes Please"
- Option 1 is the best as it provides more sports related activities, since we are losing the baseball diamond.

- A mix of the two concepts would be nice: shaded area with seating next to the playground, larger skating rink with earth berms, a basketball court but NO pickleball as it is very noisy, seating areas but not on pavement, cement animals for the playground. We need as much unstructured green space as possible. Accessibility is very important.
- Because we have many trees and our backyards are shaded, the community garden would be used a great deal. Thank you."
- I prefer concept 1. For either concept, we will need to strike a balance between community use and transient camps (current issue in the area). We either need a critical mass of park users, or areas that promote short term gatherings.
- All in, I'm very happy the park is being revitalized! Very important with all the added density recently.
- The idea I like the most is a community garden (concept 1). I would definitely look at renting a plot there
- I chose concept 1 PRIMARILY because it has a community garden. This is the element I am most hoping to see. I live in one of the many apartment buildings/condos just across the street from this space in population dense Windsor Park. There is so little green space, and no community gardens in these communities at this point.
- I would also personally really enjoy the seating area with a shade structure. Having shaded areas to relax while watching other activities in the park is valuable."
- Really appreciate the thought that has been put into both concepts.
- Feel that combining features of both concepts would enhance and be appreciate by the majority.
- #1 Sports area (basketball, NO PICKLEBALL
- #1 Paved seating area with firepit
- #1 Community gardens (MOST IMPORTANT)
- #1 Larger Ice Rink with berm
- #2 Boulders and natural features area as located in Design Concept #2
- #2 Kids' play sculptures
- #2 Shaded area placement as located in Design Concept #2
- #2 Larger Ice Rink with berm
- Really appreciate the thought that has been put into both concepts.
- Feel that combining features of both concepts would enhance and be appreciate by the majority.
- #1 Sports area (basketball, NO PICKLEBALL
- #1 Paved seating area with firepit
- #1 Community gardens (MOST IMPORTANT)
- #1 Larger Ice Rink with berm
- #2 Boulders and natural features area as located in Design Concept #2
- #2 Kids' play sculptures
- #2 Shaded area placement as located in Design Concept #2
- #2 Larger Ice Rink with berm"
- Concept #1 allows for a much more active space, which I much prefer.
- I would like to see a off leash dog park that is enclosed.

- I think if you can find a way to incorporate play structures sport court shaded areas for reflection and community gardens you will be giving something for each generation to enjoy. All ages of life. Bring more community together. Please keep as many trees as possible. We're losing all our green space and big, beautiful trees.
- a permanent fire pit for community campfires would be wonderful
- -I like the lawn games ideas, but I don't think those are the right ones. I see ping pong being used a lot at Stanley Park. Those tables can be used for a variety of games that someone would play for a lot longer than corn hole or ladder golf.
- I'm also a big fan of the garden boxes. There are so many apartments in the area. When I was living in a condo, I had a little garden plot, and it meant so much to my quality of life. It's a chance to putter."
- -Please select option 1, it provides the community with a garden which is something the community has wanted for a long time and this location is deal as we would access a water source at the hall.
- Could the sport court be used as the hockey rink in the winter? That would create more space overall.
- Or Maybe the sport court could be closer to the playground, and then you would have more green space all to the right.
- concept 1 should improve the existing play structure of the playground. Concept 2 includes such enhancements, and a toddler safe feature should be added. The park is getting more use with the new condos filling up on 58th.
- Really like Option 1. It provides a sport activity given we lose the baseball diamond. Also, many people in the community have expressed a desire to have a garden. Please go with option 1.
- I do not like the idea of a shaded seating area with tables as it invites homeless people and people from outside the community to loiter. From concept 2 there is too many "gathering areas" that take away from open space for kids to run play etc.
- I do like the ideas of concept 1 it feels more beneficial to our community without changing structure too much.
- No shrubs, they collect garbage and allow for people to hide out. Trees are preferred
- A spot to sit with shade
- Spiny donut
- 68 Malibu – uneven pavement issue
- - Yes- the baseball diamond needs to stay. It's used daily by kick ball teams and residents. Make the ice rink bigger!
- Permanently installed lawn games always seem to be good in theory, but the pieces go missing etc. sports courts are more maintenance free and are something most people cannot accommodate in their own properties.
- I think we need a sports court. Also, the existing playground is quite juvenile. It barely works for my 6-yr old and is not relevant for my 9 year old
- Concept 2 is best with the addition of a sports court

- I'm kinda stressed out about this because I'm an introvert and it's hard for me to want my peaceful little park to become a mad house on summer days. But if the minority of people want this then I'm ok with it. Blessings random user
