

Panorama Hills Street Lab

Walk the Street Lab! As part of the Neighbourhood Streets Program, The City of Calgary is working in partnership with the University of Calgary, Ever Active Schools and the Panorama Hills Community Association to learn how to improve streets in the neighbourhood for residents of all ages and abilities.

On Monday, June 14, the project team will install temporary traffic calming and pedestrian improvements along the central 2 km walking route (see map below) that will be in place through Saturday, June 19, 2021. This will involve building temporary art experiments in a variety of locations to engage with residents on the kinds of ideas that may improve the community of Panorama Hills. The experiments include:

- Water safety
- Reading nook
- Pathway art
- A playstreet
- Traffic calming
- Front drive fun
- Wayfinding and route markers

We invite residents of Panorama Hills to follow the loop and then visit engage.calgary.ca/PanoramaHills to tell us what ideas made your experience:

- Safe
- Fun
- Welcoming to all ages
- Healthy
- Supporting great travel destinations
- Offering comfortable travel choices
